

## Discussion

So, this is a thing about which we may have heard a lot of time but, do we know the importance of discussion? Do we always discuss what we are thinking about? Ask these questions to yourself and try to understand the deep meaning of it.

Now, for example:- You are thinking about agricultural technology and have great ideas in your mind regarding it, this is a thing to be discussed with someone so that your ideas and innovation will get a right direction. Like if you discuss this with your family members they will definitely appreciate and motivate you about this. The result of this appreciation will be that you will think more about it and may modify your thinking to the next level.

There should always be a healthy discussion between members of family in which we can learn something new from our elders and may be elders will also learn something new from their young ones.

But, the scenario of today's world is, parents don't know what their child is doing and children don't know what their parents are doing. In short we are busy among ourselves and don't know what is going on around us.

The main reason of this is technology. Mobile phone or technology is the reason due to which we are connected to people sitting thousand miles away from us. But this has also made a barrier among our family members. We are getting close to other people but did you ever observed that due to this we are getting far away from our family members.

Please try to minimize the use of it and discuss and have a talk to your family members like for example: you can tell your parents about your day or anything what you think is to be discussed with them.

You should at least have one hour conversation with your family members and this doesn't need any extra time. You can carry on your work and have discussion.

I would like to convey to parents that if you have conversation with your child every day then your child will freely discuss their problems with you. Hope you all have understood the importance of discussion.

Thank You.
