# "Why can't we?"

Life is full of twists and turns just like roller coaster rides. But, the one who face these challenges always glorify their life. It doesn't matter how many times ~~you~~ you fail; your hardwork and determination matters more.

Many of us might have seen handicapped people atleast once. Some of them may be not having a leg or a hand but still they do their work by their own. So, why can't we? Just think about it and ask yourself that how many times you have tried it a lot to escape from any situation? Honestly I have tried it a lots of time but, trust me the more you try to escape from it the more it gets complicated. So, just face it and try to find out solutions of your problems.

For example: A person is not having hands then he/she doesn't sit and cry about it, as crying and blaming the situation is not the solution. Other than that he/she would do ~~their~~ his/her work by their own by using legs. So, just think that if they can do this, why can't we find out solutions of our problems other than just blaming the situation.

Find out solutions to your problems  
by your own, as many times it happens that  
solution is in front of us but we don't recognise it.  
So, be happy and find out solutions by your  
own.
